

Appraisal Report Extension to an Existing Disposal Authority

Appraisal Report Extension to an Existing Disposal Authority Land Information New Zealand

File/Document ID	APP2022/0017
Agency	Land Information New Zealand
Contact Name and Details	[Name and Details Removed]
Date	19 May 2022
Disposal Authority to be extended	DA456

Purpose/Circumstances
Land Information New Zealand (LINZ) are requesting a 1-year extension to their Disposal Authority DA456. DA456 was approved by Archives New Zealand in 2011, extended for 1 year in 2021 and will expire on 03/06/2022.
Description
DA456 applies to LINZ core land paper records held by LINZ processing centres that are not already covered by disposal authorities, excluding registered and lodged land title documents, or 'instruments'. It was amended in 2021 to remove the caveat that excludes unbound inwards and outwards letters and adding examples of surveyor's reports and correspondence files.

Justification

In 2021 LINZ transferred correspondence files of the Registrar General of Land (covering the period 1864 to 1945), outwards letter books of the Registrar General of Land (covering the period 1862 to 1879) and volumes of Land Transfer Surveyor's reports (covering the period 1905 to 1914) to Archives New Zealand.

There are missing gaps in the correspondence files that may be discovered in the future which will be transferred. LINZ have recently discovered a range of material from possibly the 1920's for some of the South Island Land Districts in Christchurch and will require this DA be extended to transfer them as public records to Archives New Zealand.
